

Wiring Devices, Italy

230V/50Hz; 10A (or 16A) max.

The Italian grounded plug/socket standard, **CEI 23-16/VII**, includes two styles rated at 10A and 16A which differ in terms of contact diameter and spacing. Because they can be inserted in either direction at random, they are unpolarised. The Italian system is relatively standardised in Libya, Ethiopia, and Chile and is found randomly in North Africa.

Italian Cord-Sets are available on request.
