

Standard-Leuchtröhren
(Starter erforderlich)

USA/CDN STANDARD FLUORESCENT LAMPS
(Starter Required)
PREHEAT

Standard preheat fluorescent lamps are used in warehouses, factories, corridors, workshops, some offices and are general purpose industrial use. Standard lamps are available from 13 to 40 Watt, have a T8 or T12 tube (25.4mm or 38.1mm dia) and G13 medium BiPin base.

NOTE: Preheat fluorescent lamps require use of starters.
