There are five basic types of telephone company-provided jacks used for connection of registered equipment to telecommunications network.

8-Pos keyed, non-keyed

Anschlußbelegung und zugehörige Farbcodes.

Weitere Informationen bitte bei uns anfragen.

For Universal Service Order Code (USOC) and Registered Jack (RJ) Informations please Call our Office.

1. Miniature 6-Position Jack
2. Weatherproof Jack
3. 50-Position Miniature Ribbon Jack
4. Miniature 8-Position Jack
5. Miniature 8-Position Keyed Jack

Each type, except for the weather-proof and 8-position keyed jacks, may be arranged to provide bridged connections of A and A1 conductors.
