

In the U.S. warehouse a various types of outdoor/indoor extension cords is stocked to meet even the most demanding needs and requirements. From standard cords, to GFCI, to power block, to locking connection, to our proprietary Tru-Link™, always the right cord to get the perfect connection.

The SJTW is an outdoor/indoor cord that is UL listed and cUL certified for all weather, -40°C at 300V. It is available in 16, 14, 12, and 10 AWG and 25', 50', and 100' lengths.

Tuf-Flex® is available as 600V (SEOW) and 300V (SJEOW). It is UL listed for oil and water resistance plus all weather. This extra flexible cord is rated for extreme temperatures, -50°C to +105°C. Tuf-Flex® is color coded to AWG size for quick identification. It is cUL certified as STOW and SJTOW.

The Tru-Rubber with Tru-Link™ prevents unwanted disconnections which could result in downtime and cause safety hazards.

The portable GFCI's reduce shock hazard due to ground faults and complies with UL requirements and the National Electric Code.
