Pack	Cat No.	Pay-TV switch plate only Plate size: 70 x 114mm. Mounting centres: 84mm.
10	770FPL	F, BNC, TNC or ST fibre optic adap- tor, plate only. Hole dia. 9.5mm

Pack	Cat No.	Computer data & communication plate only Plate size: 117 x 73mm. Mounting centres: 84mm
20	770/1D1PL	Computer outlet plate for 1 x 9 pin (CP9) D connector socket
20	770/1D3PL	Computer outlet plate for 1 x 25 pin (CP25) D connector socket
20	770/2D3PL	Computer outlet plate for 2 x 25 pin (CP25) D connector socket
10	770/1CXPL	Computer outlet plate for 1 x bayonet cap TCN or BNC connector socket
10	770/2CXPL	Computer outlet plate for 2 x bayonet cap TCN or BNC connector sockets
10	770/2TBPL	Computer outlet plate for 2 x TCN/BNC connector sockets

Cable accessories

Pack	Cat No.	Suits all Standard mounting accessories. Cable terminators
10	770/1YPL	Blank plate, 1 cable terminator on back of plate, 4 terminals

Circuit identification and plain caps

Pack	Cat No.	Plain blank flush caps
100	FLUSHCAPS	Plain blank flush caps only. (Packet of 100). Specify colour.
10	CICCAPS	Engraved flush caps Engraved flush caps. Available in figures 1-99, letters A-Z. (10 of each number or letter in each pack). Black engraving standard or specify red, yellow.

Identification products

Pack	Cat No.	Identification products
10	800	Blanking piece, suits all 770 series switch plates
10	800LH	Blanking piece with hole for potentiometer mounting, suits all 770 series switch plates.
10	800ID	Blanking piece engraved - Not Safety Switch Protected. Suits all 770 series switch plates.
50	800/2	Blanking insert with opaque cap. Ass Suits all 770 series switch plates.
50	800/2CL	Blanking insert with clear cap. Ass Suits all 770 series switch plates.
50	800/2CL1	Die cut labels for circuit identification to suit Cat. No. 800/2CL
1	800/2CL3	Blank die-cut paper for Cat. No. 800/2CL2 circuit IS kit. 10 sheets per pack. Specify: WE (white); BU (blue); RED (red); or YE (yellow)

	600VA (fan)					

- Re-trigger means that a button press during the timing cycle will re-start the timing cycle.
- Toggle means that a button press during the timing cycle will stop the timing cycle.
- Fan delay means that the fan remains on for a certain period after the light is turned off. A light must be connected for the unit to operate.

Information

Some time delay switches may have compatibility issues with some types of compact fluorescent lamp or electronic ballast when the load is small. This may cause the lamp to flicker slightly in the off state. It can be overcome by increasing the size of the load, or by connecting a resistive load in parallel. For more information, please contact Customer Service

Wiring diagrams

Example application with remote switches.

A Cat No. PE170R photoelectric switch is programmed to turn external lights on at dusk and off at a pre programmed time to save energy. Outside of these hours, lights can be turned on for a timed period by the TX770 or remote push buttons.

A fan runs for a certain period after light switch is turned off.

Note

Some electronic transformers state that they are compatible with Leading Edge Dimmers. However, significant de-rating of the dimmer is usually required. Therefore, recommends the use of Trailing Edge Dimmers (Cat. No. 400T, 700T or 1000T) for these applications. If it is necessary to use a Leading Edge Dimmer, then please refer to the Dimming Electronic Transformers information sheet enclosed with the product.

* When using wirewound transformers, ensure the transformers are marked "suitable for dimming" and de-rate the dimmer by 20%.

300F	300VA	40VA
475	100VA	-
475/1	100VA	-
475/2	100VA	-
Timed fan controller		
650ET	650VA	60VA
650ET1	650VA	60VA

- **Cat. No. 475, 475/1 and 475/2** are capacitive type controllers that will eliminate motor humming. These can control only a single fan. All other fan controllers are capable of controlling multiple fans up to their maximum load.
- The capacitor values in **Cat. No. 475/1 and 475/2** are the same, and have been selected to suit most fan models. The only difference between the two is that **Cat. No. 475/2** can be installed on a multi-gang plate with other switches or dimmers.
- If **Cat. No. 475/1 or 475/2** cause the fan to operate too slowly, **Cat. No. 475** should be used instead.
- **Cat. No. 650ET and 650ET1** have an in-built two hour timer, and will automatically switch off after this time.
- **Cat. No. 650ET1** has a reduced maximum speed of 80-85% to satisfy Department of Public Works specifications.
